An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Hynds on 28 September 2005. The limitations of claims 23 and 24, as filed, were inconsistent with the limitations of the final two lines of claim 19 from which they depend. Applicant agreed to amend claims 23 and 24 to address this problem. Further, the dependency of claim 26 will be amended to depend from claim 29 to avoid potentially covering duplicate subject matter as claim 8.

The application has been amended as follows:

Claim 23 was rewritten as:

23. The sensor of claim 19, wherein the optical characteristics of one of said indicator molecules [vary] varies as a function of the concentration of oxygen.

Claim 24 was rewritten as:

24. The sensor of claim 19, wherein the optical characteristics of one of said indicator molecules [vary] varies as a function of the concentration of glucose.

Claim 26 was rewritten as follows:

26. The sensor of claim [19] 29, wherein said first side of said substrate and said second side of said substrate contain regions that are masked.
